

Customer contract

This is a contract between Babak Farshchian, from SINTEF Digital and group 3 in the subject IT2901 - Informatics Project 2. This contract lasts from the date signed and until the project is delivered and presented, 30. May 2017.

1. Goal for the project

The group will work to achieve the best possible result and together as a group produce a good product and report. With best possible result the group means grade: A

2. Procedures and order

The group will strive to use of agile methodologies in the development of product and conduct stand-up meetings with customer every two weeks or when needed.

The product, i.e. all the necessary code and documentation, will be published under license type Apache 2.0 and shall be made available on GitHub. GitHub shall be used actively throughout the development; with milestones and the choices to be documented in issues. The group will strive to document the system using the wiki.

3. Rules for decision making

Decisions are to be made collaborative, where the majority decides. On a tie vote on internal matters, the group leader vote counts double. By tied vote on matters affecting the product the customer must be contacted and decide what is best.
